

THERMAL EDGE DRIP PANEL

Thermal Edge™ Drip Panel

Thermal-Edge Products offer a integrated heated drip edge and easy attachment cleat. Thermal-Edge systems are designed for low pitch and flat roof buildings utilizing Asphalt, Metal or EPDM membrane roofing products. Its simple integrated drip edge and color matched cover is designed to eliminate ice and snow, keeping your buildings safer and reducing the risk of winter damage and dangerous snow and ice build up. The system is 4" wide and is guaranteed to eliminate ice and snow from the entire area of the panel. Each system can be installed on new or existing roofs and the heating system is self regulated, saving you time and money.
